Certificate Course on Female Healthcare

COURSE CONTENTS

- ↓ Sexually transmitted infections and cervical screening
- ↓ Polycystic Ovarian Syndrome (PCOS)
- ↓ Menopause
- ↓ Menstrual irregularities

MODULES & TOPICS

Sexually Transmitted Infections

This unit contains sexually transmitted infections (STIs) and other sexual activity. It outlines common features and symptoms, routes of transmission, key risk factors for infection, and the prevalence of infection among various demographics and regions. The importance of early recognition, diagnosis, and treatment of STIs. Contact tracing, notification of proper authorities if applicable and opportunistic counseling of patients about options for the prevention of STIs are included.

Cervical Screening.

This unit begins with explanation of the anatomy and functions of the cervix and identifies underlying causes and risk factors for cervical health issues including HPV (Human papillomavirus infection), cervical dysplasia, cervical dysplasia and cervical cancer. Investigation and offers information about cervical cancer and HPV, including updates about presenting symptoms, risk factors. Tests and emphasizes their role as one part of the diagnostic process.

Polycystic ovarian syndrome.

This module examines the prevalence, presenting symptoms, contributing factors and underlying problems associated with PCOS. Common features, risk factors and indications for further investigation to diagnose this condition are outlined. The module offers a framework for applying the diagnostic criteria for PCOS including presenting symptoms, specific criteria for diagnosis and the process for eliminating other potential causes and conditions to optimize the health of women undergoing treatment for PCOS. Tools and resources for screening and management of the condition are also included. The module concludes by outlining symptoms of complications to look for and provides instructions for detection and management of these symptoms.

Menopause

This module gives comprehensive information about the definitions, features and underlying causes of menopause and discusses the typical process and duration for each of the four stages: perimenopausal, menopausal, early postmenopausal and late postmenopausal. Methods for assessment and differential diagnosis of menopausal symptoms are outlined, including indications for further investigation. Four management options are addressed: lifestyle modifications, "natural" or complementary therapies, non-hormone pharmaceutical options and menopause hormone therapy (MHT). It covers existing research for complementary therapies and identifies potential benefits and limitations. Different types of MHT are reviewed including potential benefits and risks, safety considerations, and testing methods based on current evidence. It also acknowledges potential contraindications for MHT and statistics that suggest a lack of observable effectiveness in treating certain health conditions. In conclusion, the module outlines effective courses of action for adjusting treatment and managing complications.

Menstrual irregularity

This module defines the common menstrual problems of abnormal menstrual bleeding, dysmenorrhea and premenstrual dysphoria and includes classification systems, diagnostic criteria, and clinical guidelines for management and treatment for each condition. It offers resources and guidance for clinicians in treating individual women who present with associated symptoms or meet the diagnostic criteria for these disorders. Each condition is broken down to subdivisions and outlines specific guidelines and aims of treatment for each case. The module provides information about screening tools, indications for additional investigation, and which examinations are recommended for diagnosis of each condition. Finally, the module discusses prevalence, common symptoms, and potential patient impacts, and details treatment options along with advice and supporting evidence for the effectiveness of each treatment approach.

Syllabus and Course Description

COURSE OUTCOME

Certificate Course in Female Healthcare is based on to understand and cure different types of problems. Women require health care more and access the health care system more than do men. While part of this is due to their reproductive and sexual health needs, they also have more chronic non-reproductive health issues such as cardiovascular disease, cancer, mental illness, diabetes and osteoporosis.

"Analytical Instrument Handling Methods"

Objective of Program

- ❖ In the laboratories, to gain hands-on analytical instruments.
- ❖ To experience on industry-standard equipment including HPLC colorimeter, Flame photometer, conductometer, turbidometer and potentiometer instrumentation.
- ❖ To become familiar with different types of chromatography and learn how to operate, maintain and troubleshoot these techniques.
- ❖ To learn how to handle and prepare solid dosage forms for analysis by spectrophotometric and chromatographic analytical procedures.

Content of course:

Basic Learning skill for the laboratory Analytical Instruments

1. HPLC
2. TLC
3. Flame Photometer
4. Colorimeter
5. Refractometer
6. Conductometer
7. Turbidometer

Learning Outcomes:

1. Appraise and understand the differences between an Active Pharmaceutical Ingredient and a Formulated Drug Product and critically explore how the final dosage form is formulated.
2. Evaluate the fundamental science of the physicochemical properties of selected drugs in their native and formulated dosage forms.
3. Critically assess the elements of Quality Control (QC) and Batch release testing procedures on final dosage forms required by the respective Pharmacopeia's (BP, USP, IP, JP) and the specifications that the products must meet.
4. Accurately assess the importance of GLP and GMP in research and manufacturing organizations; critically examine the impact of non-compliant medicines.
5. Evaluate the importance of, and perform sample and standard preparation in chromatographic analysis (including HPLC).
6. Appraise the theory of HPLC and expedite its operation, maintenance and troubleshooting.

Report of "Analytical Instrument Handling Method"

Date: 02/07/2019 to 07/10/2019

The objective of certificate Course on "Analytical Instrument Handling Method" is to become familiar with Flame photometer, HPLC etc. and learn how to operate these techniques to improve professional skill of students.

Mr. A. O. Maske delivered speech on "Analytical Instrument Handling Method". He explains HPLC, TLC, Flame photometry, colorimeter, refractometer, neploturbidimeter and UV Spectrophotometer.

Mr. A. O. Maske explains and gives demo on handling of HPLC and UV spectrophotometer etc. and also explains importance of HPLC as well as give importance of qualitative and quantitative analysis.

He explains how purity quantities of pharmaceutical product check by using various analytical instruments.

Certificate Course on

Yoga and Meditation

Course Objectives:

- Promoting positive health, prevention of stress related health problems and rehabilitation through Yoga.
- Invoke scientific attitude and team spirit to channelize their energies in to creative and constructive endeavors.
- To enable them to establish Yoga Therapy centers in the service of common man.

Course Outcome:

Upon completion of the course, the student will be able to demonstrate knowledge of the following topics:

- Develop body awareness.
- Learn how to use their bodies in a healthy way.
- Manage stress through breathing, awareness, meditation and healthy movement.
- Build concentration.
- Increase their confidence and positive self-image.
- Feel part of a healthy, non-competitive group.

MODULE I:

Foundations of Yoga: History, Evolution of Yoga and Schools of Yoga: Origin of Yoga, History and Development of Yoga, Aim and Objectives of Yoga, True Nature and Principles of Yoga. Yoga in Modern Times: Yogic Traditions of Ramakrishna and Swami Vivekananda, Shri Aurobindo; Yoga traditions of Maharshi Ramana and Swami Dayanand Saraswati

MODULE II:

Behavioural Psychology: Psychology as a Science of Behaviour; Definition of Behaviour; Psychic forces and human behaviour, behaviour and Consciousness, Psychological basis of behaviour;

Personality: Nature and Types of Personality; Determinants of Personality: Heredity and Environment; Facets and Stages of Personality Development; Personality Theories of Sigmund Freud, Alfred Adler and C.G. Jung, Carl Rogers; Assessment of Personality;
