About The College

We are one of the most successful ventures of Wainganga Bahu Uddeshiya Vikas Sanstha's, has established itself as premier educational institute offering Diploma and Degree level courses in Pharmacy in Bhandara district since 2003. We possess highly qualified faculty members and modern infrastructural facilities along with focused academic and co-curricular activities have resulted in consistent strong placement records of our students in different areas of pharmaceutical, Clinical research and marketing industries.

The college takes pride in being at the forefront in admitting, guiding and training aspiring student pharmacists to shape their career in Pharmacy by imparting quality education throughout these years and it also provides a well-equipped platform to carry out research activities that are recognized at national and international levels. College is approved by AICTE and PCI, New Delhi, permanent affiliation with RTMNU, Nagpur and DTE Mumbai.

Seminar Review

As we know the Pharmaceutical Industry is continuously changing. It has come to our attention that there are many new trends created in the Pharmaceutical Industry that we certainly want to bring in attention. Indian pharmaceutical products are exported to more than 200 countries around the globe including highly regulated markets of USA, Europe, Japan, Africa and Australia. Significant growth was witnessed in various therapeutic segments.

The pharmaceutical industry will continue to witness major changes and challenges. At the same time, markets are diversifying and new fields of growth are opening up. Rapid development of the emerging markets, progress in drug research, the rise in generics production, the availability of high-potency drugs and innovations in manufacturing processes will sustainably modify the global pharmaceutical landscape.

As considering the current trends in pharmaceutical industry there is a need of well qualified technical manpower with appropriate knowledge of pharmacy education. In addition, a knowledgeable and competent pharmacist can help the Indian Pharmaceutical Industry to move away from being a Generic hub to a R&D hub. In short, an educational revamp is required, which will not only benefit the patients, but also the nation as a whole. The demand for pharmacists is further growing with the growth of the pharmaceutical industry in India. This national seminar will provide a good platform to the exchange of ideas amongst the various stakeholders from pharmacy profession.
